

## CONTENTS.

- I. *Account of Guernsey, and the other Channel Islands.* By J. Mac Culloch, M.D. F.L.S. Member of the Geological Society, p. 1
- II. *A Description of the Red Oxyd of Copper, the production of Cornwall, and of the varieties in the form of its Crystal, with observations on the Lodes which principally produced it; and on the Crystallization of the Arseniated Iron.* By William Phillips, Esq. Member of the Geological Society. p. 23
- III. *A Sketch of the natural History of the Cheshire Rock-Salt District.* By Henry Holland, Esq. Honorary Member of the Geological Society. p. 38
- IV. *Account of the Pitch Lake of the Island of Trinidad.* By Nicholas Nugent, M.D. Honorary Member of the Geological Society. p. 63
- V. *Memoir on the Laumonite.* By M. le Comte de Bournon, Foreign Secretary of the Geological Society. p. 77
- VI. *Observations on the Physical Structure of Devonshire and Cornwall.* By J. F. Berger, M.D. Honorary Member of the Geological Society. p. 93
- VII. *An Account of "The Sulphur" or "Souffrière" of the Island of Montserrat.* By Nicholas Nugent, M.D. Honorary Member of the Geological Society. p. 185
- VIII. *Observations on the Wrekin, and on the great Coal-Field of Shropshire.* By Arthur Aikin, Esq. Member of the Geological Society. p. 191
- IX. *A Chemical Account of an Aluminous Chalybeate Spring in the Isle of Wight.* By Alexander Marcet, M.D. F.R.S. one of the Physicians to Guy's Hospital, and Member of the Geological Society. p. 213

CONTENTS.

- X. *A Sketch of the Geology of some parts of Hampshire and Dorsetshire.*  
By J. F. Berger, M.D. *Honorary Member of the Geological Society.*  
p. 249
- XI. *Notice respecting the Geological Structure of the Vicinity of Dublin ;  
with an account of some rare Minerals found in Ireland.* By William  
Fitton, M.D. p. 269
- XII. *On the Mineralogy of the Malvern Hills.* By Leonard Horner, Esq.  
*Secretary of the Geological Society.* p. 281
- XIII. *Notice accompanying a Section of Heligoland, drawn up from the  
Communications of Lieutenants Dickinson and Mac Culloch, of the  
Royal Engineers.* By John Mac Culloch, M.D. F.L.S. *Member of the  
Geological Society.* p. 322
- XIV. *Observations on some of the Strata in the Neighbourhood of London,  
and on the Fossil Remains contained in them.* By James Parkinson, Esq.  
*Member of the Geological Society.* p. 324
- XV. *Memoir on Bardiglione or Sulphate of Lime, containing a Sketch  
of a Theory of the true Nature of Plaster, as well as of its Properties ;  
in order to determine the differences that exist between it and Bardig-  
lione.* By The Count de Bournon, F.R.S. &c. *Foreign Secretary of  
the Geological Society.* p. 355
- XVI. *Notice respecting Native Concrete Boracic Acid.* By Smithson  
Tennant, Esq. F.R.S. &c. p. 389
- XVII. *Sketch of the Geology of Madeira.* By the Hon. Henry Grey  
Bennett. p. 391
- XVIII. *Notice respecting the Decomposition of Sulphate of Iron by  
Animal Matter.* By W. H. Pepys, Esq. F.R.S. *Treasurer of the  
Geological Society.* p. 399
- List of Donations.* p. 401
- Index.* p. 413
