CONTENTS.

PART I.

II. On the Geological Structure of the North-eastern Part of the County of Antrim. By James Bryce, Jun. M.A. F.G.S. (Member of the Geological Society of Dublin, and of the Natural History Society of Belfast.) p. 69

III. On the Squaloraia. By H. Riley, M.D. (Communicated by Charles Stokes, Esq. F.G.S.) p. 83

CONTENTS.

VIII. Observations on a Well dug on the South side of Hampstead Heath.
   By Nathaniel Thomas Wetherell, Esq. F.G.S. . . . p. 131

IX. Observations on the Strata penetrated in sinking a Well at Diss, in

X. On the Structure of the Neighbourhood of Gamrie, Banffshire, par­
    ticularly on the Deposit containing Ichthyolites. By Joseph
    Prestwich, Jun., Esq. F.G.S. . . . . . . . . p. 139

XI. Notices on the Geology of the North Coast of the Counties of Mayo
    'and Sligo in Ireland. By Archdeacon Verschoyle, M.A. (Com­
    municated by Roderick Impey Murchison, Esq. P.G.S.) . . . p. 149

XII. Description of some Fossil Crustacea and Radiata, found at Lyme
     Regis, in Dorsetshire. By William John Broderip, Esq. F.G.S.
     F.R.S. &c. V.P.Z.S. . . . . . . . . . . . p. 171

XIII. On the Bones of Birds discovered in the Strata of Tilgate Forest, in
      Sussex. By Gideon Mantell, Esq. LL.D. F.R.S. . . . p. 175

XIV. On the Syenite Veins which traverse Mica Slate and Chalk at Good­
    land Cliff and Torr Eskert, to the south of Fair Head, in the County
    of Dublin . . . . . . . . . . . . . . . . . p. 179

XV. On certain Peculiarities in the Cervical Vertebrae of the Ichthyos­
    aurus, hitherto unnoticed. By Sir Philip Grey Egerton, Bart.
    M.P. V.P.G.S. . . . . . . . . . . . . . . . p. 187

XVI. Notes to accompany a Geological Map of the Forest of Dean Coal­field. By Henry Maclauchlan, Esq. F.G.S., Employed on the Ordi­nance Trigonometrical Survey . . . . . . . . . . . . . p. 195

XVII. Notice respecting a Piece of recent Wood, partly petrified by Carbon­ate of Lime, with some Remarks on Fossil Woods. By Charles
      Stokes, Esq. F.G.S. . . . . . . . . . . . . p. 207

XVIII. Remarks on a Section of the Upper Lias and Marlstone of Yorkshire,
        showing the limited Vertical Range of the Species of Ammonites
CONTENTS.

and other Testacea; with their Value as Geological Tests. By Louis Hunton, Esq. (Communicated by J. F. Royle, Esq. F.G.S.) p. 215

XIX. On the Distribution of Fossil Remains on the Yorkshire Coast, from the Lower Lias to the Bath Oolite inclusive. By W. C. Williamson, Esq., Curator of the Manchester Society of Natural History. p. 223

XXI. Notices and Extracts from the Minute-Book of the Geological Society

2. Notices of the Red Marl and Lias of Worcestershire; of a Fault by which they are affected; and of Fossil freshwater Shells at Shotover Hill. By Hugh Edwin Strickland, Esq. F.G.S. [Read December 4, 1833.] p. 260

5. Extract from a Letter addressed by Dr. Daubeney to the Curator, on a saline Spring near Oxford. [Read June 10, 1835.] p. 263
